

Rethinking **sustainability** together

Policymakers and the public are demanding sustainable solutions. And we deliver them! But with you as partners rather than doing it alone: By joining forces we can achieve so much more:

Take an active role in a dual system and act collaboratively

Assume responsibility and refine the recycling system for packaging

Enhance the participating companies' credibility in terms of sustainability

Our solution:

Economical, transparent and cost-effective

Interseroh+ is an independent company with a strong core expertise in operating dual systems. Your benefits as a partner:

-  Right to be consulted in decisions on closing raw material loops
-  Fully documented costs, structures and process flows
-  Access to innovative recycled raw materials and recyclates
-  Advice on packaging optimisation, innovations and disposal
-  National and EU-wide compliance with packaging licensing laws

Join us in taking the excellent concept of dual systems further and use the strong added value delivered by this recycling alliance to drive your business forward in a sustainable way!

Our plus?

Your added value!

Benefit from having access to:

- + Germany's largest and most modern sorting infrastructure
- + Pan-European recycling and marketing expertise
- + "Made for Recycling", the seal confirming the recyclability of your packaging
- + Europe's largest and most advanced laboratory for developing post-consumer plastics.

Sustainability and more

As a participating partner, you will play a leading role in relation to sustainability.

Together, we will communicate the topic authentically to end users.

Our recycling work saves resources, cuts greenhouse gas emissions and protects the climate.

Interested? Then contact us and become part of this strong community promoting transparency and sustainability!
