# International Recyclability Analysis

## Packaging analysis for the international market

The "Made for Recycling" testing method is established in Germany as the standard for recyclable packaging. Now the service for independent recyclability assessment has been extended to selected countries.

- Certificates for countries:**
- Austria
  - Belgium
  - Denmark
  - France
  - Germany
  - Italy
  - Netherlands
  - Poland
  - Spain
  - Switzerland
  - UK
  - ...the journey continues

### Our service

- **Assessment of recyclability in the above countries**  
Individual statement for each country
- **International certificate**  
Get your recyclable packaging certified for the international market
- **M4R Country Guide - International Packaging Guideline**  
Get detailed information on the recycling infrastructure and legal framework for each country

### Extension to other countries:

Are you interested in recyclability infrastructure of a specific country? We would be happy to extend our service tailored to your needs.
